

MUMTAZ AHMAD

SENIOR ANGULAR DEVELOPER | FRONT-END ARCHITECT

New Delhi, India • +91-9958339204 • mumtazahmad2004@gmail.com • linkedin.com/in/mumtazahmad

PROFESSIONAL SUMMARY

Senior Angular Developer and Front-End Architect with 12+ years in frontend engineering and 8+ years specializing in Angular architecture, state management and performance optimization. Deep expertise across Angular 8, Angular 15, Angular 17, Angular 18, Angular 19, Angular 20 and Angular 21, NgRx (Store, Effects, Selectors), RxJS, Angular Signals, Zoneless Change Detection, Standalone Components, and Nx Monorepo / Micro-Frontend architectures (Module Federation). Design, develop and maintain robust, modular, well-documented web applications, collaborating with cross-functional teams to identify and prioritize requirements. Skilled at troubleshooting and resolving technical issues efficiently, driving code reviews to improve overall code quality, and staying current with the latest trends and technologies in Angular development. Proven track record building scalable, WCAG-accessible SPAs, enterprise design systems and reusable component libraries, and leading Angular modernization initiatives from legacy NgModules to Signals-based, zoneless architecture. Experienced technical lead who mentors engineers, drives code reviews and architecture decisions, and partners with cross-functional stakeholders in Agile/Scrum delivery environments.

WORK EXPERIENCE

Cognizant (via Pacific)

May 2025–Present

Senior Angular Developer

- Modernized a large-scale component library to Standalone Components and a Signals-based state layer, upgrading the Liverpool Click & Collect / Control XEC platform through four major Angular releases (18→21).
- Improved maintainability and initial-load performance using @if/@for Control Flow, @defer Deferrable Views, OnPush change detection and modular SCSS.
- Built WCAG-accessible kiosk, hostess, QR and barcode-driven interfaces using Angular Material and Google Material Design, integrated with REST APIs, Firebase and real-time SockJS updates.
- Delivered AG Grid views for order management, returns, replenishment and reporting with server-side sorting, filtering and pagination.
- Implemented barcode/QR scanning, digital signatures and encrypted payloads to secure order handover.
- Authored Node.js build/automation scripts and delivered releases through GitLab CI/CD with JFrog Artifactory and Docker, gated by SonarQube and Black Duck security scans.
- Led Signals/Zoneless modernization as the team's go-to engineer, partnering with backend engineers on API response design.

CBRE (via Savitr)

Dec 2023–Apr 2025

Senior Angular Developer

- Migrated legacy NgModule-based code to Standalone Components on an esbuild pipeline, reducing bundle size and improving build efficiency.
- Maintained >80% test coverage across critical modules using Jest and Jasmine/Karma with TDD/BDD practices.
- Modernized Angular architecture with Signal Inputs/Outputs, Signal Queries and inject(), and managed application state using NgRx Effects, Selectors and RxJS.
- Delivered scalable enterprise UIs using Angular 17/18 and Angular Material, including complex AG Grid views with custom cell renderers, grouping and virtualization for large datasets.
- Contributed WCAG 2.1 design-system fixes for focus management and ARIA compliance.
- Delivered releases through GitLab CI/CD with JFrog Artifactory, SonarQube and Black Duck security gates.

Tata Consultancy Services

Sep 2021–Nov 2023

Associate Consultant

- Designed reusable chart, filterable-table and drill-down dashboard components adopted across business modules.
- Led Jest unit-testing initiatives, reviewed pull requests and onboarded developers to Angular and NgRx conventions.
- Built enterprise Angular applications using NgRx Store and data-driven dashboards, delivered through Git-based CI/CD workflows in Agile/Scrum teams.
- Partnered with QA to define testable acceptance criteria, improving feature delivery quality.

E2E Networks Limited

Apr 2019–Aug 2021

Senior Technical Lead – Angular

- Led the Angular upgrade path and adopted Ivy, improving tree-shaking and build performance.
- Centralized authentication and interceptor handling, reducing duplicated token-refresh logic across feature modules.
- Built modular SPAs with lazy loading, route guards and HTTP interceptors, defining conventions to control initial bundle size as the platform expanded.
- Mentored developers and ran workshops on Angular patterns, component design and RxJS operators.

Algoworks

May 2018–Apr 2019

Senior Software Engineer

- Introduced reusable component patterns during code reviews, reducing duplicated markup.
- Built responsive Angular 2+ and Angular 7/8 applications using TypeScript, HTML5, CSS3 and Bootstrap, integrated with RESTful APIs.
- Delivered cross-browser/cross-device compatible interfaces, translating client stakeholder requirements into working UI features.

Pitney Bowes

Apr 2013–Mar 2018

Senior Software Engineer

- Created reusable UI patterns and utility scripts, reducing repetitive implementation effort.
- Delivered web applications spanning internal tools to large enterprise solutions using JavaScript, TypeScript, ES6+, HTML5 and CSS3.
- Integrated RESTful APIs, collaborating with backend and QA teams across requirements, development and release cycles.

PROJECTS

Retail Click & Collect Platform — Liverpool (Mexico) — Control XEC (CXEC)

- Modernized a large-scale component library to Angular 21, Standalone Components, Signals and OnPush.
- Built a warehouse and Click & Collect order-management platform covering kiosk, hostess, QR/barcode workflows, returns, replenishment, reporting and appointment scheduling.
- Implemented ZXing barcode/QR scanning, digital signatures and encrypted payloads to secure order handover, with real-time SockJS updates and custom route preloading.
- Delivered AG Grid data tables for reporting and inventory screens through GitLab CI/CD, gated by JFrog Artifactory, SonarQube and Black Duck.
- Stack: Angular 21, Angular Material, AG Grid, Firebase, ngx-translate, RxJS, Karma/Jasmine, Docker, GitLab CI/CD.

Casino Jackpot Fill & Verification UI

- Built a gaming operations UI for jackpot fill, processing and verification workflows using a shared enterprise design system.
- Delivered WCAG-accessible infinite-scrolling views with role-based route/auth guards.
- Optimized UI responsiveness for large transaction volumes, maintaining strict SCSS/Stylelint standards.
- Stack: Angular 18, PrimeNG, Bootstrap 5, ngx-translate, shared design system, ESLint/Stylelint.

Buyside / Sellside Trading Portal (RFO)

- Structured an Nx monorepo into two independently deployable Angular applications with shared UI, core, wizard and workflow libraries.
- Managed complex multi-step trade state using NgRx Store, Effects and Router-Store.
- Built responsive Highcharts trading dashboards and delivered multi-language support across both applications.
- Stack: Angular, Nx, NgRx, Highcharts, PrimeNG, ngx-bootstrap, SCSS.

Telecom On-Demand Network Provisioning Portal

- Built a self-service connectivity ordering portal with real-time order tracking and Google Maps integration.
- Implemented NgRx-driven ordering flows using OpenAPI-generated API clients, file uploads, multi-currency presentation and STOMP/WebSockets.
- Delivered internationalization with locale-aware formatting and GTM analytics to track ordering-funnel drop-off.
- Stack: Angular 15, NgRx, Google Maps, STOMP/WebSockets, OpenAPI codegen, ngx-translate.

EDUCATION

Magadh University, India **2011**
Master of Computer Applications

Board of Technical Education, India **2008**
Bachelor of Commerce

CORE SKILLS

Core Frontend: Angular 8, Angular 15, Angular 17, Angular 18, Angular 19, Angular 20, Angular 21, Angular CLI, TypeScript, JavaScript (ES6+), Node.js, RxJS, NgRx (Store, Effects, Selectors, Router Store), HTML5, CSS3 / SCSS

Angular Architecture: Standalone Components, Angular Signals (Inputs/Outputs/Queries), Zoneless Change Detection, OnPush Change Detection, @if/@for Control Flow, @defer Deferrable Views, Dependency Injection, inject(), Angular Router, Route Guards, HTTP Interceptors, Lazy Loading

Enterprise & System Architecture: Nx Monorepo, Micro-Frontends, Module Federation, Design Systems, Reusable Component Libraries, Scalable / Modular Architecture, Frontend Architecture, SOLID Principles, Design Patterns

Frameworks & Libraries: Angular Material, Google Material Design, AG Grid, PrimeNG, Tailwind CSS, Bootstrap, Storybook, Highcharts, ngx-translate, Firebase

Performance Optimization: Bundle Optimization, Tree Shaking, Code Splitting, esbuild, Ivy, Initial Load Optimization, Change Detection Optimization

Testing & Tools: Jest, Jasmine / Karma, Cypress, TDD/BDD, SonarQube, Black Duck, ESLint / Stylelint, Git, GitLab, GitHub Actions, JFrog Artifactory, Docker, Webpack, Gulp, CI/CD

Integration: REST / OpenAPI, WebSockets / STOMP, SockJS, Redux, GraphQL, Google Maps API, GTM Analytics

Leadership & Delivery: Technical Leadership, Technical Mentoring, Code Reviews, Code Quality, Troubleshooting & Issue Resolution, Architecture Decisions, Agile/Scrum, SDLC, Stakeholder Management, Cross-Functional Collaboration, Accessibility (WCAG 2.1) Compliance
